For planning and organization only. This workbook does not provide medical advice.

How to Use This Planner

The first month with a new baby can change from one day to the next. Use only the pages that help you. Skip, repeat, or adapt sections whenever your needs change.

■ Choose a simple focus for each day.	■ Record practical details you want to remember.
■ Use the support pages to coordinate help.	■ Keep questions for your healthcare team in one place.
■ Review your needs at the end of each week.	■ Give yourself permission to leave pages blank.

My reminder: I do not need to do everything. I can focus on what matters most today.

My First-Month Priorities

■ Rest and recovery	■ Baby care organization
■ Meals and hydration	■ Accepting support
■ Keeping important appointments	■ Protecting quiet time
■ Staying connected with my support team	■ Making our home feel manageable

Celebrate what you managed, learned, and adjusted. You do not need to have completed everything on this list.

■ I know who I can contact for support.
■ I have important appointments written down.
■ I know where I keep important information.
■ I have a short list of practical supplies to restock.
■ I have identified a few easy meals or food options.
■ I have made space for rest and personal care.

■ I have identified what routines are working for us.
■ I have identified what I want to change or simplify.
■ I am giving myself room to adjust as life changes.

A note for me:

The first month was not about doing everything perfectly. It was about learning, adjusting, caring, and taking one day at a time.
